  - description (varchar(600))
  - item 1 (varchar(100))
  - item 2 (varchar(100))
  - item 3 (varchar(100))
  - item 4 (varchar(100))
  - item 5 (varchar(100))
  - answer: item X
  - Subejct
    - Topic

AS teacher/T.A., I WANT TO crud exams with questions from catalog TO simulate exams for students

CRUD

📎 Anexar   🔗 Vincular item   ⌄   ⋯

Descrição

- Manage crud of exam in the data base

Exam

📎 Anexar   🔗 Vincular item   ⌄   ⋯

Descrição

- Create a contract for the frontend. Fields
  - Id
  - name (varchar(100))
  - List of questions (max 100)
  - Due date

AS user, I WANT TO sign in and sign up to the platform

User

🔗 Anexar   🔗 Vincular item   ⌄   ⋯

Descrição

- first name
- last name
- email
- birth date
- type
  - depends how the sign in was created
    - students: direct from open platform
    - teachers: by invite from admin
    - admin: self sign in by system

CRUD

🔗 Anexar   🔗 Vincular item   ⌄   ⋯

Descrição

- admins and teachers can manage crud of user in the data base
- students: can change some attributes (type is prohibited)

AS student, I WANT TO simulate exams created by teachers

Create and view

📎 Anexar   🔗 Vincular item   ⌄   ...

Descrição

- Manage only create and view of exam done in the data base

Exam result

📎 Anexar   🔗 Vincular item   ⌄   ...

Descrição

- student Id (foreign key from user)
- list of tuples
    - question (foreign key from question)
    - exam (foreign key from exam)
    - answer

AS student, I WANT TO know the final result of my exam simulation

Exam Score

🔗 Anexar 🔗 Vincular item ⌄ •••

Descrição

- With exam result create a exam score
  - tuples:
    - exam result (foreign key from exam result)
    - student (foreign key from user)
    - result

AS student, I WANT TO know the topics to study in a specific week

Topics

📎 Anexar   🔗 Vincular item   ⌄   •••

Descrição

- From exam, read infos from each question
  - exam (foreign key from exam)
  - list of topics
